*I am very pleased with the initiative of the Lithuanian Defence and Security Industry Association to merge the Lithuanian defence and security industry with science and research. I strongly believe that this initiative will significantly contribute to the implementation of targets for the defence of Lithuania and increase the overall defence potential of our country.*

*The Ministry of Defence actively cooperates with the Research Council of Lithuania, the Ministry of Education and Science, and various NATO defence and security industry organisations. Due to our cooperation with Lithuanian manufacturers, we are ready for an active discussion about various defence issues as well as initiatives related to the participation of Lithuanian industries and companies in the development of military potential; for example, in such areas as unmanned aerial vehicles, creation of night-vision devices, robotics.*

*I would also like to invite members of the Lithuanian Defence and Security Industry Association to take an active part in the activities of the NATO Energy Security Centre of Excellence in Vilnius. The Centre carries out various joint projects with scientists from NATO member states and partner countries. On the basis of these projects, the Alliance members will receive scientific recommendations regarding opportunities to increase the efficiency of their armed forces.*

*I believe in the benefits of cooperation between Lithuanian defence and security companies, the Ministry of Defence, and scientists in order to develop the military potential of NATO member states and partners seeking to overcome security challenges of the 21<sup>st</sup> century.*

*Minister of National Defence Juozas Olekas*

Hello,

*You are now holding in your hands the first publication which systemises services provided by companies working in the industry of Lithuanian defence and security. In addition to this, the publication provides essential information about organisations working in this industry.*

*The Lithuanian Security and Defence Industries Association is a rather new institution, having been established in spring 2014. However, our association is ambitious and unites daring, creative, innovative and highly patriotic companies that are willing to create and develop a new industry of business in Lithuania.*

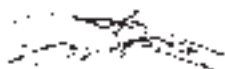

*The members of the association aim to implement new business standards in the defence and security industry of Lithuania based on the fundamental principles, aims and moral values of our country. These are intended to significantly strengthen Lithuania's national defence system.*

*Because of this, we highly value the agreement with the Ministry of National Defence of the Republic of Lithuania (MND) that was signed on 6th February 2015. According to the agreement, our institutions will intensively cooperate with the companies and institutions that work with the MND and are specialised in the fields of defence and security.*

*In the name of all of our members I would like to thank the Ministry of National Defence of the Republic of Lithuania, as well as the Lithuanian Armed Forces, because they understand and support this initiative to further develop the defence and security industry in Lithuania.*

*Some of the companies belonging to the Lithuanian Security and Defence Industries Association already provide the highest quality services and wares to Lithuanian and foreign customers.*

*It is very important to strengthen partnership and cooperation in all fields because we are all involved in the creation of an open, transparent and competitive defence and security industry in Lithuania, and I have faith that it will become part of transatlantic defence and security projects.*

*Egidijus Skužinskas  
The President of the Lithuanian Security  
and Defence Industries Association*

# ALTAS

**General characteristics of the company's activities:** producing minibuses and ambulances.

**Number of employees:** 105

**Defence industry products and services (company achievements and plans):** the company adapts and equips different types of cars, making adjustments for particular purposes to create convenient, safe, durable and reliable transport for professionals. The company's main products are:

- small passenger buses
- ambulances
- other vehicles for special services and special purposes

## Contacts:

Company name:	ALTAS KOMERCINIS TRANSPORTAS UAB
Head of the company:	Edvardas Radzevičius
Year of incorporation:	2002
Office address:	15 Centrinė St., Pikučiškių, Avižienių, Vilnius district, LT-14300, Lithuania.
Phone/fax:	(+370 5) 240 40 00, (+370 5) 240 41 11

Website:	www.altas-auto.lt

## ALTECHNA R&D

**General characteristics of the company's activities:** the company specialises in lasermicromachining solutions and systems for the industrial and academic sectors.

**Number of employees:** 14

**Defence industry products and services (company achievements and plans):**

- workshop of Photonics can help the defence industry in processing special heat sensitive-materials to very high levels of accuracy and quality
- laser micromachining laboratory services: technical feasibility studies, small-scale production and laser process development
- development of custom laser systems: industrial and scientific laser micromachining workstations and optical modules
- other laser workstation-related products: process automation software, special optical elements and optomechanical components

### Contacts:

Company name:	ALTECHNA R&D; brand name: Workshop of Photonics
Head of the company:	Eugenijus Kurtinaitis
Year of incorporation:	2007
Office address:	6A Mokslininku St., Vilnius, LT-08412, Lithuania
Phone/fax:	(+370 5) 272 57 38, (+370 5) 272 37 04
E-mail:	info@wophotonics.com
Website:	www.wophotonics.com

# ALTECHNA

---

**General characteristics of the company's activities:** Altechna UAB is a supplier of laser-related products and complex solutions.

**Number of employees:** 51

**Defence industry products and services (company achievements and plans):** optical components, mostly dielectrically coated: achromatic lenses, multi-band mirrors, waveplates, Silicon/Germanium optics for mid-IR applications.

---

## Contacts:

Company name:	ALTECHNA UAB
Head of the company:	Tadas Lipinkas
Year of incorporation:	1996

# ARGUS

**General characteristics of the company's activities:** security services.

**Number of employees:** 1116

**Defence industry products and services (company achievements and plans):** the company offers personal and property protection, which can be helpful in providing support to Host Nations and protecting sites of public infrastructure.

## Contacts:

Company name:	ARGUS SECURITY COMPANY UAB
Head of the company:	Romualdas Jonaitis
Year of incorporation:	1995
Office address:	Virsutine St. 25, Klaipėda, LT-92258, Lithuania
Phone/fax:	(+370 4) 631 24 49, (+370 4) 641 15 54

# ARVEKA

**General characteristics of the company's activities:** the supply of special equipment and the provision of services to the military and to law enforcement authorities.

**Number of employees:** 10

**Defence industry products and services (company achievements and plans):** the company has successfully implemented the following projects:

- the supply of security (minesweeper) clothing to the Lithuanian Armed Forces
- the supply of monitoring and measurement equipment to the Lithuanian Armed Forces
- the supply of surveillance equipment to the State Border Guard Service
- the supply of logistic support equipment to the Lithuanian Armed Forces
- the supply of flight personnel clothing to the Lithuanian Air Force
- the supply of containers for transportation of hazardous materials to the police's national team for anti-terrorist operations in Lithuania
- the supply of warm outerwear to the Lithuanian Armed Forces

**Contacts:**

Company name:	ARVEKA UAB
Head of the company:	Egidijus Skužinskas
Year of incorporation:	28th February, 1994.
Office address:	9-6 L. Stuokos-Gucevičiaus St., Vilnius, LT-01122, Lithuania
Phone/fax:	(+370 5) 261 09 90
E-mail:	info@arveka.lt

# AUTOKURTAS

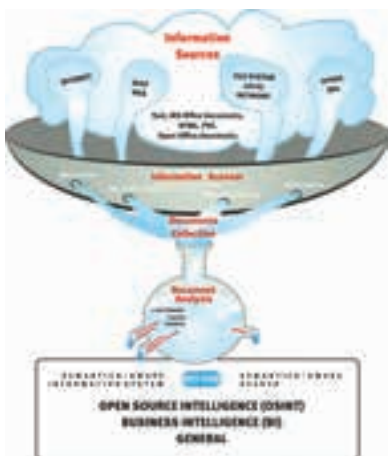

**General characteristics of the company's activities:** it is the largest truck service network in Lithuania engaged in the provision of services related to the sale of spare parts and the repair and maintenance of vehicles and equipment to clients.

**Number of employees:** 138

**Defence industry products and services (company achievements and plans):** the company has specialised in the repair of military vehicles from its establishment. The company owns original equipment for diagnostics and repair of Mercedes-Benz military trucks and unified equipment for diagnostics and repair of military trucks of other makes. It also supplies original and non-original spare parts for Mercedes-Benz vehicles and other trucks. The company can offer autonomous heating and comfort solutions for cars and armoured vehicles as well as containers. Existing contracts with solid suppliers have enabled successful participation in tenders for the supply of M113 spare parts and the repair of machines since 1999. The company's 15 years of experience enable it to provide and supply high-quality services and products.

## Contacts:

Company name:	AUTOKURTAS UAB
Head of the company:	Vytautas Garbenis
Year of incorporation:	21st April, 1998
Office address:	13 Verslo St., Kumpių, Kaunas district, LT-54311, Lithuania
Phone/fax:	(+370 3) 739 10 90, (+370 3) 739 14 54
E-mail:	info@autokurtas.lt
Website:	www.autokurtas.lt

## BPTI

**General characteristics of the company's activities:** providing research, development and consulting services in a variety of different fields.

**Number of employees:** 24

**Defence industry products and services (company achievements and plans):** mostly the company specialises in the field of information technology – robotics, the application of language technologies, data mining and visualisation, usually with partners who perform (specialised) development tasks, while BPTI concentrates on research and consulting and focuses on Open Source Intelligence (OSINT): Internet and other resources scanning, the extraction of semantic information from different sources and the application of statistical, artificial intelligence and machine learning techniques to data analysis, information and data visualization.

### Contacts:

Company name:	BALTIC INSTITUTE OF ADVANCED TECHNOLOGY
Head of the company:	Dr. Tomas Žalandauskas
Year of incorporation:	2008
Office address:	15 Saulėtekio Ave., Vilnius, LT-10224, Lithuania
Phone/fax:	+370 683 87 737
E-mail:	info@bpti.lt
Website:	www.bpti.lt

# DEFENSA

**General characteristics of the company's activities:** wholesale and retail trade in weapons and other special products for the military and law enforcement authorities.

**Number of employees:** 6

**Defence industry products and services (company achievements and plans):**

- cases for weapons, weapon accessories and other equipment
- physical security and riot control equipment
- equipment for use in de-mining and searches for explosives, contraband or metal
- sightings for sporting and hunting
- gas sprayers; gas cartridges; dazzling, deafening, painful smoke; gas grenades; weapons and parts; mufflers and other accessories
- climbing equipment and vehicles with towing facility
- ammunition loading equipment
- training ammo for shooting one into another
- pocket wind meters and mini-meteo stations
- equipment for weapon-cleaning, maintenance and protection
- hand and gun torches

**Contacts:**

Company name:	DEFENSA UAB
Head of the company:	Andželika Skužinskienė
Year of incorporation:	February 24th, 2004
Home address:	9-2 L. Stuokos-Gucevičiaus St., Vilnius, LT-01122, Lithuania
Phone/fax:	(+370 5) 265 55 55
E-mail:	info@defensa.lt
Website:	www.defensa.lt

## ELAS

**General characteristics of the company's activities:** designing and producing various laser micromachining systems for scientific and industrial application.

**Number of employees:** 10

**Defence industry products and services (company achievements and plans):**

ELAS UAB designs and produces various micromachining systems using nano-, pico- and femto- second lasers for scientific and industrial application. In collaboration with Applied Research Laboratories (FTMC, LTC, VU FF, KTU) and partner companies, researches of micromachining laser radiation on materials are carried out. Detailed analysis of ultra-short pulse laser micromachining process allows ELAS to offer effective laser micromachining solutions for many modern applications. The company is able to project and produce an innovative and hi tech micromachining system, which meets clients' needs. The company's devices can be used for the following micromachining processes: surface structuring, direct writing, cutting, drilling, material ablation.

### Contacts:

Company name:	ELAS UAB
Head of the company:	Jonas Klimantavičius
Year of incorporation:	2010
Office address:	231 Savanorių Ave., Vilnius, LT-02300, Lithuania
Phone/fax:	+370 655 14 467
E-mail:	info@e-lasers.com
Website:	www.e-lasers.com

# EL SIS

**General characteristics of the company's activities:** creating and installing various customised software solutions, information systems, telecommunication and tactical communication systems, telemetry, environmental monitoring, smart house, digital service and interactive content management solutions, other engineering systems and implementing military infrastructure projects.

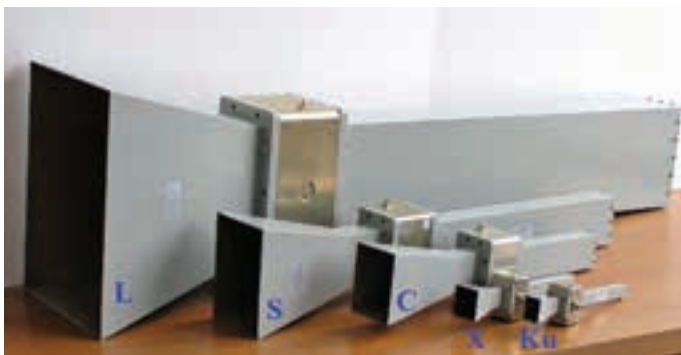

**Number of employees:** 165

**Defence industry products and services (company achievements and plans):**

- tactical automated command and control information system (TACCIS)
- training simulators: DMTI – distributed maintenance training infrastructure, BMT – basic maintenance trainer
- tactical data Link 16/22 implementation (STANAG 5516-5522)
- ISR tracking standard implementation (STANAG 4676)
- motion imagery implementation (STANAG 4609)
- tactical radio communication systems; satellite communication systems; command and management system installation and integration
- military infrastructure sites

**Contacts:**

Company name:	EL SIS UAB
Head of the company:	Arūnas Gedvila
Year of incorporation:	February 1st, 1991
Office address:	14 Baltupio St., LT-08303 Vilnius, Lithuania
Phone/fax:	(+370 5) 268 81 88, (+370 5) 268 81 99
E-mail:	info@elsis.lt
Website:	www.elsis.lt

## FTMC

**General characteristics of the company's activities:** carrying out research and development in scientific fields such as laser technology, optoelectronics, nuclear physics, organic chemistry, bio- and nanotechnology, electrochemical materials science, functional materials, electronics and measurement technologies.

**Number of employees:** 646

**Defence industry products and services (company achievements and plans):**

- high-powered microwave sensors
- high-powered microwave radiation direction detection systems
- electronic device EMC immunity tests
- protectors against EMP
- high-pulsed magnetic field sensors and meters
- gas sensors
- temperature, electrical units, time and frequency, ionisation measurement technologies
- compact systems for spectroscopic terahertz imaging
- interface pressure sensors for the control of sub-bandage compression
- electroporators for medical application
- biosensors
- inverters for photovoltaic systems.

### Contacts:

Company name:	STATE RESEARCH INSTITUTE CENTRE FOR PHYSICAL SCIENCES AND TECHNOLOGY
Head of the company:	Prof. Dr. Gintaras Valušis
Year of incorporation:	2010
Home address:	231 Savanoriu Ave., Vilnius, LT-02300, Lithuania
Phone/fax:	(+370 5) 264 92 11, (+370 5) 260 23 17
E-mail:	office@ftmc.lt
Website:	www.ftmc.lt

# GEOZONDAS

**General characteristics of the company's activities:** developing and manufacturing UWB equipment and components according to users' specific requirements.

**Number of employees:** 35

**Defence industry products and services (company achievements and plans):** developing and manufacturing UWB Measurement Systems for frequency ranges up to 40 GHz. Components of the system may be used for both civil and military industry. The radar enables the detection of live objects in places difficult to access (in ruins or under rubble) by registering breathing and palpitation using the UWB method. The company develops and manufactures ground-penetrating radars (GPR). The GPR enables the detection of hidden or buried metallic and non-metallic objects (for example mines). Geozondas manufactures:

- UWB antennas up to 40 GHz
- nanosecond and picosecond pulse generators: more than 20 types of pulse generator heads has been developed, featuring different waveforms and amplitudes (Gaussian, Monocycle, Short Rise)
- sampling oscilloscopes with between two and eight channels, and with a channel bandwidth of up to 40 GHz
- programmable delay lines
- rotary positioners with one, two or three axes
- pulse generator mainframes
- track and hold samplers for UWB radar measurement systems.

Geozondas UAB fulfils:

- measurement of antenna parameters
- measurement of UWB parameters of different materials
- dielectric permittivity measurements
- reflectivity measurements (absorber materials, camouflage, etc.)
- s - parameters measurement
- reflectometry of the different units and components

## Contacts:

Company name:	GEOZONDAS UAB
Head of the company:	Borissas Levitas
Year of incorporation:	1995
Office address:	16 T. Ševčenkos St., Vilnius, LT-03111, Lithuania
Phone/fax:	(+370 5) 213 54 04, (+370 5) 233 38 16
E-mail:	info@geozondas.com
Website:	www.geozondas.com

# GGG

**General characteristics of the company's activities:** manufacturing ammunition and parts of ammunition.

**Number of employees:** 67

**Defence industry products and services (company achievements and plans):** the company is one of the most up-to-date and modern small-arms ammunition manufacturers in the world, and has innovative technology and modern equipment, which enables the manufacture of NATO-approved ammunition. GGG produce cal. 7.62×51 mm NATO ball rounds according to STANAG 2310 requirements of cal. 5.56×45 mm NATO ball rounds according to STANAG 4172 requirements, and .308 win ammunition according to CIP requirements.

## Contacts:

Company name:	GIRAITĖS GINKLUOTĖS GAMYKLA AB
Head of the company:	Aleksandras Nikonovas
Year of incorporation:	2000
Office address:	8 Topoliu St., Giraitės, Kaunas district, LT-54310, Lithuania
Phone/fax:	(+370 3) 730 23 90, (+370 3) 730 23 94

Website:	www.ggg-ammo.lt

# GLIMSTEDT

**General characteristics of the company's activities:** one of the leading business law firms in the region acting in most major local and cross-border transactions.

**Number of employees:** 60

**Defence industry products and services (company achievements and plans):**

Glimstedt law firm has extensive expertise in providing legal counsel and representation services to clients from the defence and security industry, from representing the manufacturers to working with state and international institutions, regarding public procurements in the defence sector, M&A, legal regulation of renewable energy resources situated in the vicinity of defence sites, etc. For example, company's experience includes:

- Representing defence and security manufacturers locally and internationally in the public procurement sector. Representing of the client was successful in the public procurement announced by the Ministry of Defence of the Republic of Lithuania for the supply of products and services
- Representing a manufacturer of special purpose equipment for defence and security during their communications with a foreign strategic investor, a multinational corporation
- Carrying out a legal analysis of foreign practices to better understand how renewable energy infrastructure is regulated in relation to nearby defence structures, and what legal solutions can be found for problems of interference, the company drafted amendments to legislation in collaboration with a national defence institution, as a result of which a loophole in the legal framework was filled in
- Representing a multinational company offering military helicopter maintenance services
- Representing both private parties as well as national security institutions, acting as defendants and claimants in litigation in various courts

**Contacts:**

Company name:	GLIMSTEDT
Head of the company:	Linas Sesickas
Year of incorporation:	1999

# JAMETANA

**General characteristics of the company's activities:** renewable energy, production from cardboard, consultancy.

**Number of employees:** 5

**Defense industry products and services (company achievements and plans):** the production of biomethane, building park with 3–4 mobile biogas production stations; the production of cardboard pallets between 3 and 5 kg. in weight for export and military logistics, transportation load between 0.5 tn. and 1.2 tn, expected volume – 300,000 pallets a year, and the production of cardboard medical beds; expected volume of more than 40,000 beds a year.

## Contacts:

Company name:	JAMETANA UAB
Head of the company:	Julius Niedvaras

Phone/fax:	+370 698 77 447
E-mail:	julius.niedvaras@jametana.lt
Website:	in preparation

# JUGRITA

**General characteristics of the company's activities:** supplying and maintaining equipment for emergency situations and emergency medical equipment for personal health protection and rescue.

**Number of employees:** 3

**Defence industry products and services (company achievements and plans):**

Jugrita UAB supplies medical equipment and provides services to the Military Medical Service, the Firefighter and Rescue Department, the Emergency Health Situation Centre, Emergency Medical Centres and other rescue services. The company supplies only the highest-quality equipment which meets strict requirements for harmonised safety and quality standards. It is proud to supply brands such as Ferno and Weinmann for the Lithuanian market and that Lithuanian ambulances are equipped with these companies' products.

## Contacts:

Company name:	JUGRITA UAB
Head of the company:	Rita Jurgionienė
Year of incorporation:	1998
Office address:	J. Kubiliaus str. 6, Vilnius, LT-08234, Lithuania
Phone/fax:	(+370 5) 213 31 37
E-mail:	info@jugrita.lt
Website:	www.jugrita.lt

## KTE

**General characteristics of the company's activities:** cargo transportation by road.

**Number of employees:** 57

**Defence industry products and services (company achievements and plans):** the company is able to transport loads of up to 80 tonnes in weight and 30 metres in length (wheeled or tracked vehicles, various industrial equipment and constructions) using its own vehicles. It can provide between 10 and 12 trucks with specialised semi-trailers at once. All trucks are equipped with positioning and control devices, as well as with all the necessary equipment for cargo loading (ramps, broadening equipment). The company's employees are experienced, having been involved in a large number of transportation projects for military and civil equipment. The company's long-term plan is to increase its participation in transport projects for NATO both on Lithuanian territory and elsewhere.

### Contacts:

Company name:	KLAIPĖDOS TRANSEKSPEDICIJA UAB
Head of the company:	Gintautas Šiaškus

# LITAK-TAK

**General characteristics of the company's activities:** specialising in the design, production, modernisation, repair, maintenance and sale of air traffic control systems and its components, radars, ammunition, surface-to-air missile systems and their components for military and civilian purposes.

**Number of employees:** 29

**Defence industry products and services (company achievements and plans):** LiTak-Tak UAB has been providing mediation service in sales of air traffic control systems and radars for military and civilian purposes since its establishment. In 2012, the company started operating as a scientific-production enterprise. Litak-Tak UAB now produces the following types of products:

- air traffic control equipment
- radars for military and civilian purposes
- data and voice recording systems
- surface-to-air missile systems
- Litak-Tak UAB provides the following types of services:
- the modernisation and repair of both civil and military radars
- services related to back-up/after-sale support
- integration of civil and military radar systems

## Contacts:

Company name:	LITAK-TAK UAB
Head of the company:	Rytis Godelaitis
Year of incorporation:	2009
Home address:	Registered address - 35 Polocko St., Vilnius, LT-01205, Lithuania;
Office address:	Vytauto St., Keturiasdešimt Totorių, Vilnius district, LT-14120, Lithuania

# MILREM

**General characteristics of the company's activities:** providing repair services for the military, as well as engineering and maintenance.

**Number of employees:**

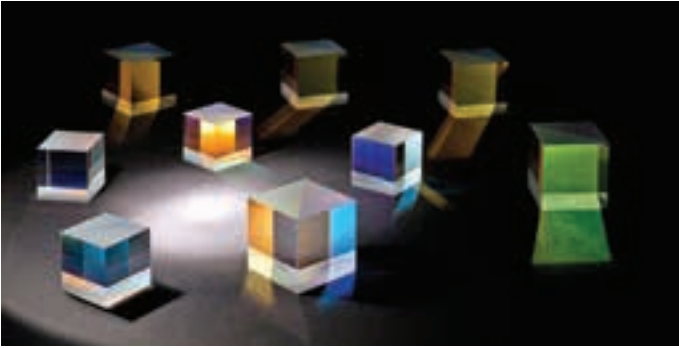

**Defence industry products and services (company achievements and plans):**

The company's mission is to be a reliable partner to its civilian and defence sector partners, offering flexible product development solutions and support for heavy vehicles for the entirety of their lifespan. Milrem UAB is a subsidiary of the Estonian company SEBE, and has grown out of its parent company as a branch clearly dedicated to the defence sector. It provides the following types of services:

- heavy duty and (armoured) military vehicle repair and maintenance (e. g. XA-180, XA-188, DAF, MAN, MB)
- support for heavy duty and military vehicles for their entire life cycle
- production and reproduction of spare parts
- engineering the unmanned ground vehicles (UGV) for military usage

**Contacts:**

Company name:	MILREM UAB
Head of the company:	Kuldar Väärssi
Year of incorporation:

# OPTIDA

**General characteristics of the company's activities:** optical thin film coatings (laser components), optical elements, research and manufacturing.

**Number of employees:** 46

**Defence industry products and services (company achievements and plans):**

Optida UAB is the largest optical coating company in Lithuania, constantly developing and manufacturing a broad range of optical components as well as custom coatings suitable for various laser systems and other optical devices. Optical coatings are one of the most important components assisting the implementation of technologies to manipulate light: reflecting, splitting into multiple beams, the reduction of reflection losses, combining a number of light beams, splitting polarisations, compensating for group delay dispersion, etc. Optida UAB offers various optical coating and development services for optical components according to the requirements of scientists and engineers. Its main products are:

- dichroic beam splitters
- polarisers
- polarising beam cubes
- dielectric mirrors
- antireflective coatings, precision interference filters

# POLIMASTER INSTRUMENTS

**General characteristics of the company's activities:** the manufacture and sale of instruments for measuring radiation.

**Number of employees:** 15

**Defence industry products and services (company achievements and plans):**

Polimaster Instruments UAB produces:

- electronic personal radiation dosimeters for dose and dose rate measurement
- personal radiation detectors, including spectroscopic, sensitive, pocket-sized devices for looking for nuclear or radio-active substances
- hand-held search tools to detect alpha, beta, gamma and neutron radiation and accurately measure the radiation level
- compact radionuclide identifier to detect alpha, beta, gamma and neutron radiation sources and identify radionuclides
- automated radiation portal monitors to prevent the illicit trafficking of radioactive and nuclear materials using trucks, cars, trains, cargo or people
- instruments to simultaneously detect chemical warfare agents and gamma radiation

## Contacts:

Company name:	POLIMASTER INSTRUMENTS UAB
Head of the company:	Michail Semeniuk
Year of incorporation:	2006
Office address:	4 Ežero St., Didžiasalis, Vilnius district, LT-13264, Lithuania

# RAEL

**General characteristics of the company's activities:** international private para-military security group.

**Number of employees:** 5

**Defence industry products and services (company achievements and plans):**

RAE LT UAB provides the following services:

- physical protection of sites
- car and perimeter protection
- routing
- threat assessment
- micro-climate rating

## Contacts:

Company name:	RAE LT UAB
Head of the company:	Robertas Jurgelaitis

# RITĖJAS

---

**General characteristics of the company's activities:** workwear manufacture.

**Number of employees:** 50

**Defence industry products and services (company achievements and plans):** delivery of possible new textile products, their technical solutions for these products, technological descriptions and their explanation. Thanks to the modern manufacturing process (ETON) and production (LECTRA) system, orders are prepared in a fast and precise manner, and new products are designed.

---

**Contacts:**

# SURVIVAL

**General characteristics of the company's activities:** retail accoutrements.

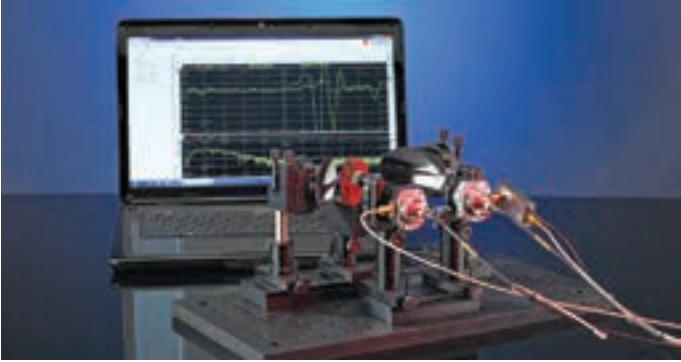

**Number of employees:** 8

**Defence industry products and services (company achievements and plans):**

the company cooperates with state power structures and private security services, which does not end after the sale has been made. The company is always trying to help find the right information, invite to the trainings or seminars. It supports the country's defence and internal security. All power structures and law enforcement officers, that show an official certificate, are given a 10% discount. The company is a partner of the National Association of Practical Shooting; all members who show a certificate are given a 10% discount.

# TERAVIL

**General characteristics of the company's activities:** terahertz range sources and receivers, Furje spectroscopy and imaging systems.

**Number of employees:** 6

**Defence industry products and services (company achievements and plans):** the main products of the company are photoconductive, terahertz frequency range, pulsed sources and receiver and time domain Fourier spectroscopy systems. Sources and receivers are designed to work in combination with  $800 \pm 40$  nm and  $1060 \pm 40$  nm femtosecond lasers. The company also develops and produces all other parts (except lasers) used in terahertz frequency Fourier spectrometers. These products can be used in the identification of materials at a distance and in imaging, as well as in investigating the optical and dielectric properties of various dielectric and semiconductor materials.
